Definitions of Terrorism

Joanna Holvey-Bowles

18 U.S.C. § 2331 defines "international terrorism" and "domestic terrorism" for purposes of Chapter 113B of the Code, entitled "Terrorism:"

"International terrorism" means activities with the following 3 characteristics:

• Involve violent acts or acts dangerous to human life that violate federal or state law;

• Appear to be intended (i) to intimidate or coerce a civilian population; (ii) to influence the policy of a government by intimidation or coercion; or (iii) to affect the conduct of a government by mass destruction, assassination, or kidnapping; and

• Occur primarily outside the territorial jurisdiction of the U.S., or transcend national boundaries in terms of the means by which they are accomplished, the persons they appear intended to intimidate or coerce, or the locale in which their perpetrators operate or seek asylum.

No Universal Consensus on Terrorism Definition

A 2005 paper by the United Nations discusses the inability to create universal steps to combat international terrorism due to the lack of consensus on a legal definition of terrorism. It further outlines concerns about issues of ethnic, racial and religious profiling.

Student Participation Rates in France

According to the 2015 Open Doors Report, France has ranked #4 for the past 5 reporting years with steady numbers – over 17,000 students attending programs there annually.

- 2009-10: 17,161
- 2010-11: 17,019
- 2011-12: 17,168
- 2012-13: 17,210
- 2013-14: 17,597 (most recent numbers from 2015 report)

Place and the New Normal

Loren Ringer, APUAF

- 3 events spaced 20 years apart have affected previous held conceptions of safety in Paris:
  - 1995 Armed Islamic Group (GIA) Métro & RER Bombings
  - 2005 Suburban Riots
  - 2015 ISIL Terrorist Attacks
Place and the New Normal

Loren Ringer, APUAF

The consequences for education abroad:

• Anyone can be a target, anywhere, and by any means.
• Pre-departure and on-site orientations must prepare students for non-specific terrorist activity.
• Risk assessment is more challenging when less containable (geographically speaking).
• It becomes increasingly harder to reassure U.S. schools regarding the locations of study centers, student housing, excursions, etc.

Comparative Crisis Response

Julie Friend, Northwestern University

What made responding to this crisis so much more difficult than the last comparable crisis: the July 7, 2005 London Transit Bombings, where 52 civilians were killed and over 700 were injured in an eerily similar coordinated terrorist attack?
